

Simplify Your Accounting

The cloud-native VUE DMS helps you take back control of dealership finances and make the best decisions in real time. The simple, user-intuitive interface, combined with advanced data security and interconnected modules, makes it easy to manage all transactions and reconciliations at your fingertips.

Simplified Accounting

No more filing cabinets. Keep your entire history of accounts in a secure digital system.

A Clearer View

See the information you need without having to sort through line after line of clutter.

Financial Protection

Only allow access to those who need to see certain information.

Key Features

Easy Filtering and Sorting - Journals, schedules and ledgers work like a filterable spreadsheet.

Easy Navigation - Between hyperlinks, universal search, and favorite menus, finding what you need is as simple as navigating a website.

Edit Employee Access and Permissions - Adjust who can see what and limit access to those who need to see it.

Key Benefits

Digital Security - Your data is stored and backed up in the cloud, protected and monitored by Microsoft's high-tech data centers and leading cybersecurity experts. Have peace of mind knowing your information is safe from cyber attacks, break-ins and natural disasters.

Data Integrity - VUE tracks all transactions and related accounts from the Service, Parts and Sales modules in real time, ensuring you always work with the most up-to-date information in one place.

Ease of Use - VUE functions as a website, so it is accessible on any device without software installation or VPN required. This improves adoption time and lowers the learning curve typically associated with new systems.

“

VUE takes the worry out of having to put tape on the machine every night, in case something happens. I never had any problems but being more secure – not just physically – is important for us. It’s also a good system to have in case a tornado comes through.

”

-Terri Parker, Comptroller, Mack Grubbs Hyundai
